

Let us do the heavy lifting so you don't have to...

@ccess Wireless Data Solutions

Access - the "first" word in wireless M2M data solutions

Value Added Services.

Access Wireless Data Solutions (AWDS) offers value added services with the flexibility to meet the specific needs of our clients. We can provide these services directly to you, act as an extension of your corporation and work directly with your end-user customers, or tailor a program to meet your unique service needs. Many of these services are at no additional cost to the end-user customers or business partners purchasing products.

Product Sourcing and Selection.

We stock an extensive, diverse inventory of products which are available for immediate shipping, including modems and antennas from the leading device manufacturers, RF Cables and other accessories, providing a single point of contact for turn-key solutions. If needed our professional services group offers bench top integration services and have successfully designed integrated end-to-end wireless data solutions for many different devices including RTU's and PLC's. We offer competitive pricing dependent on the opportunity and can drop ship blind if needed.

Carrier Activations and Provisioning Services.

AWDS works closely with leading carriers, including Verizon, Sprint and AT&T, to coordinate service activations for new or existing established accounts. This service is offered free of charge. For a small set-up fee, we can program, configure, test and label modems prior to shipping. Why worry about your devices not working or coming up on the carrier network out of the box?

Coverage Analysis and Carrier Selection.

All the greatest technology in the world doesn't mean a thing if it can't reliably and consistently reach the device in the field. Proper carrier selection is a critical component of any remote M2M solution. Let us utilize our extensive industry expertise to assist you with the preliminary carrier selection. If additional and more detailed coverage analysis where specific site coverage maps need to be generated, these services are available for a fee.

Technical Support & Customer Service.

We provide Tier 1 technical support for our end-user customers and Tier 2 for our vendor partners. Our technical support and customer services teams are available free of charge Monday - Friday, 8:00 AM – 6:00 PM EST. We believe that your success is our success.

Warranty, Extended Warranty & RMA Execution.

AWDS will process warranty and RMA execution at no charge other than shipping. Advanced Replacement Programs are also available for an additional fee. We are and want to be the single point of contact for our customers with product issues on all the products we sell. We also have a free replacement program for out of the box failures for the first 30 days after purchase.
