

# Sentinel Plus software

With Sentinel Plus software you can track all of your lift station information, all via the web

The screenshot displays the Sentinel Plus software interface. At the top, the CIMTEC logo is on the left, and a dropdown menu shows the selected device as '129-2 : Sentinel1000'. Below this is a navigation bar with tabs for Devices, Monitor, Control, Gauges, Graphing, Mapping, Reports, Setup, and Tools. The 'Monitor' tab is active.

On the left side, there is a sidebar with the following sections:

- ESN: 129-2**  
Sentinel1000
- Monitor Options**
  - Display Current Status
  - Display Event History
- Records Shown Per Page**  
50

The main content area shows a **Report Summary** for device 129-2:

ESN	129-2
Name	Sentinel1000
Location	Greensboro, North Carolina
Summary	All Systems Normal

Below the summary is a **Report Detail** section:

Time Stamp	Thursday, April 26 2007 4:05:36 PM Eastern Daylight Time
Report Type	Status Update
RTU Power Voltage	0.16 Volts
RTU Signal Strength	0 %
RTU Current Temperature	89 F 32 C
RTU Minimum Temperature	78 F 26 C
RTU Maximum Temperature	0 F -18 C

At the bottom of the screenshot, there are three smaller panels:

- A map showing the location of the device in Greensboro, North Carolina.
- A 'Monitoring Station' panel with various status indicators.
- A 'Graphs' panel showing a line graph of 'Backup Battery Voltage' and 'Signal Strength' over time from 1:15:00 PM to 4:15:00 PM.

One simple fee covers unlimited use of the web console for monitoring and reporting. Sentinel Plus software provides unlimited notification and alarming to mobile devices and email addresses.
